

COUNT RECORDER DATA LOGGER PCDL-2000

DESCRIPTION:

The SenSource Count Recorder is a miniature USB battery-powered data logger. The Count Recorder eliminates the need to hand-record counts every day, providing stamped intervals by minute, hour, day or week. This effective, low-cost recording device can be used with most non-directional SenSource people and vehicle counters to easily record and transfer data to your PC or laptop. The Count Recorder operates for months at a time without resetting. After installing the software, the Count Recorder data logger allows you to choose which interval you would like to use to monitor your traffic. (Most typical is an increment of one hour.) The Count Recorder data logger is a convenient tool for capturing, saving and reporting traffic data. Count Recorder software functions on Windows 2000, XP, Vista and 7.

FEATURES:

- › Built-in USB connector that plugs directly into your computer
- › Display and print time-stamped data in graphical or tabular form
- › Operates autonomously until connected to a PC for downloading
- › Up to 32,510 events or state changes can be recorded
- › CSV text or MS-Excel File Formats
- › Battery back-up saves data in event of power failure
- › Programmable Scaling Factor

PARAMETER	MIN	TYP	MAX	UNITS
Memory	-	-	16,363	Records
Operating Temperature	5°F/-15°C	-	140°F/60°C	F°/C°
Battery Life	-	6	12	Months
Battery Type	1/2 AA 3.6V Lithium Ion			
Enclosure	3.86"L x 1.05"H (98mm x 26.8mm)
