SenSource offers a basic vehicle counting solution to count vehicles on a roadway, parking garage or drive thru.

It uses a pressure hose that increments a count for each axle of passing vehicles. It's easy to install and battery powered.

Counts can be viewed on an 8-digit LCD display or collected on a count recorder data logger to transfer counts to a PC.

LCD Display Model: $495
Count Recorder Model: $695
Replacement Hose Kit: $135
